Intro

Thank you for your interest in General Foundries products.

We are pleased to introduce the 4th edition General Foundries product catalog.

In this catalog, you will find an extensive listing of products; however, not the complete range of products we offer.

If there is a specific product you require but cannot find in this catalog, we encourage you to reach out to your local representative so we can assist you further.

About us

Founded in 1983, General Foundries manufactures and offers a wide range of domestic and imported gray and ductile iron construction castings, as well as fabricated metal products.

Over the years, we have established a robust supply chain and customer base, allowing us to diversify our product portfolio and provide an assortment of services tailored to each customer's specific requirements.

Our mission is to provide exceptional quality products in the most economical and efficient way possible. We do this by implementing a few key practices:

- 1) Embedding our core values into our business. Our core values include, but are not limited to: Precision, Progression, Safety, Honesty, Respect, and Commitment.
- 2) Developing new product lines and further developing existing product lines, growing our infrastructure to increase overall productivity.
- 3) Utilizing the expertise of our team to engineer, manufacture, and continuously collaborate internally and externally to provide the most adept solutions.

In addition to the services we offer, we pride ourselves in providing unparalleled customer service. We believe in providing a personalized and flexible experience to ensure customer satisfaction.

We are a family owned and operated company, and believe in treating everyone, including our team, vendors and customers as the same.

Material

Gray Iron used in the manufacturing of General Foundries' castings shall be made in either Class 30B or Class 35B grade iron (as specified), and shall comply with ASTM-A48 specifications.

Ductile Iron used in the manufacturing of General Foundries' castings shall be in compliance with ASTM-A536 specifications.

Steel used in the fabrication of General Foundries' products shall be in compliance with ASTM-A36 specifications.

Technical Info

Strength: All castings made in Class 30B iron meet and exceed 30,000 p.s.i., and in Class 35B iron meet and exceed 35,000 p.s.i.

Tolerances: As-cast dimensions may vary by $\pm 1/16$ inch per linear foot

Machining: Round traffic bearing manhole castings are machined on both seating contact surfaces of the frame and cover to achieve a full bearing surface. Square and rectangular castings are not machined on bearing surfaces unless specified.

Custom Sizes: Our fabrication plant allows us to manufacture custom size parts for all special needs / requirements with very minimal lead-time.

Weights: Weights are not listed in this catalog. Please contact your regional sales representative directly should you require product weight(s).

Load Ratings

Non-Traffic (Up to 2,500 lbs.) - Intended for use in areas that are not subject to any vehicular traffic.

Light Duty (Up to 10,000 lbs.) - Intended for use in areas that are subject to very light vehicular traffic.

Heavy Duty (Up to 40,000 lbs.) - Intended for use in areas that are subject to regular vehicular traffic. Castings within this designation comply and exceed AASHTO H-20/HS-20S specifications, and are proof load tested to 40,000 lbs. as per AASHTO M-306 specifications.

Extra Heavy Duty (Up to 200,000 lbs.) – Intended for use in areas that are subject to extra heavy vehicular traffic. Castings within this designation comply with and exceed FAA design loading, and are proof load tested to 200,000 lbs. and beyond.

Destructive Testing: Proof load testing is a precaution that we implement in order to determine the load bearing designations of castings. For more information, please reference AASHTO M306 specification. The basic method of testing is as follows:

- 1) A focused load (based on castings load rating) is applied on a 9" x 9" contact area on the center of the casting.
- 2) The cover, grate, and/or frame is then inspected for any cracks or deformations.
- 3) Any cracks or deformations would result in the rejection of that casting.
- 4) This process is repeated for other casting heats.

Note: When a new casting pattern is made, multiple samples are tested beyond the required load to ensure the casting receives a correct load rating designation.

Referenced Specifications

ADA – Americans with Disabilities Act of 1990

For Gray Iron:

ASTM-A-48 – Standard Specification for Gray Iron Castings

AASHTO-M 105 – Standard Specification for Gray Iron Castings

AASHTO-M 306 – Standard Specification for Drainage Structure Castings

For Ductile Iron:

ASTM-A-536 – Standard Specification for Ductile Iron Castings

For Steel:

ASTM-A-36 – Standard Specification for Carbon Structural Steel

ASTM-A-572 – Standard Specification for High Strength Structural Steel

Bolted, Gasketed, and Watertight Assemblies

IMPORTANT: Clear opening dimensions on bolted or watertight castings are smaller by 1/2" than the dimensions listed in this catalog due to the addition of bolting lugs. If a larger clear opening dimension is required, please select a casting with a larger clear opening dimension.

Bolted Applications

Bolted castings are provided with a standard stainless steel hex head bolt. We offer drill and tap services for customers who would prefer to install their own tamper-proof bolts. The benefits of using bolted covers and grates are preventing theft, vandalism and unwarranted access.

Bolted Frame & Cover (Cross Section)

SS hex head bolt detail

Gasketed Applications

Gasketed covers are provided with either an “O” ring gasket or a t-gasket (please specify).
The benefits of using gasketed covers are:

- 1) Reducing water infiltration into sanitary collection systems
- 2) Allowing user to access manhole without having to remove bolts

Cover with “O” ring gasket (3D)

Gasket detail (3D)

Cover with “O” ring gasket (Cross Section)

Gasket detail (Cross Section)

Water Resistant / Watertight Applications

Watertight castings are provided with bolts and an “O” ring gasket. The benefits of using watertight castings are:

- 1) Preventing water infiltration into sanitary collection systems
- 2) Preventing theft, vandalism and unwarranted access

Note: We recommend that bolted, gasketed and watertight castings be periodically inspected in order to ensure ongoing functionality.

Complete Watertight Assembly

CONFIDENTIALITY

Any information exchanged between buyer and seller is strictly confidential, and shall not be disclosed under any circumstances without the written consent of both buyer and seller.

PAYMENT TERMS

NET 30 Days: Upon approval of credit, buyer must pay full value of invoice within (30) days of invoice date.

Late Fee: A fee of 2% per month shall be applied to any past due accounts.

Collection Disclaimer: In the event that seller must take action for collection of any unpaid balance, buyer agrees to pay all costs of collection, including reasonable attorney's fees.

Returns: A 20% restocking fee will be deducted on all merchandise returned by buyer to seller. Merchandise shall not be returned without written permission from seller to buyer. Buyer must prepay return shipping charges. Seller may choose not to refund buyer for goods returned in non-saleable condition. Seller reserves right to refuse acceptance.

General Foundries Limited Warranty Statement

The terms and conditions of the following warranty must be agreed to by the buyer and the seller in order to conduct any exchange of goods. General Foundries shall be referred to as “seller” and customer shall be referred to as “buyer”. Buyers order shall only be accepted according to the following terms and conditions unless otherwise specified and agreed to with buyers and sellers written consent.

WARRANTY

General Foundries warrants its products to be free from any defects of material or workmanship for up to (1) year of sale from date of invoice.

This warranty includes replacement of defective product with same or similar product if same product is not immediately available.

This warranty does not extend to any product or accessory that fails due to improper installation, servicing, modification by any party other than seller, or application for which product sold is not intended.

THIS WARRANTY IS SPECIFIC AND GIVEN IN LIEU OF ANY OTHER WARRANTY, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO, IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT.

This warranty gives you specific legal rights, and you may also have other rights, which may vary from state to state.

To initiate a claim, buyer must provide the failed product along with a statement identifying the nature and location of the product failure, and a dated proof of purchase within (14) days of the date of failure to seller.
